

Technical Architect

- Very Technical, Compared to Other Architects
- Hybrid Between Architect and Engineer
- Great for a Highly Capable Engineer That Can See the Big Picture
- May Require Scripting and Coding as Well
- Typical Farther from Executives, and with Lower Pay

Solutions Architect

- Hybrid Between Business and Engineering
- Technical Competency of a Single Vendor
- Moderately Technical
- Strong Design Skills
- Communication, Leadership, Sales and Presentation Skills
- Executive Presences, Business Acumen and Emotional Intelligence

Cloud Architect

- Still Hybrid Between Executive and Tech Position
- Requires STRONG Design Skills
- Technical Competency of Network, Datacenter, and Cloud Tech
- Moderately Technical, Knowledge of All Vendors
- Communication, Leadership, Sales and Presentation Skills
- Executive Presences, Business Acumen and Emotional Intelligence

Enterprise Architect

- Leadership Focused, with Some Tech
- Moderate Tech Competency on the Full Spectrum of Availabilities
- Somewhat Technical, All About Transforming the Business with Tech
- Strong Design Skills, with a Team
- Requires At Least as Much Business Acumen as Tech Knowledge
- Communication, Leadership, Sales and Presentation Skills
- Executive Presences, Business Acumen and Emotional Intelligence

Business Architect

- Pure Business and Leadership
- Mapping Strategy to Execution
- Involves People, processes and Tech Optimization
- Communication, Leadership, Sales and Presentation Skills
- Executive Presences, Business Acumen and Emotional Intelligence
