

Experience the power of the ION Commodities community

We have over 25,000 users worldwide. We use their feedback to improve our solutions so they can do more, faster and better than before.

More than 1,200 companies have joined our community, including organizations of all sizes from every region of the world.

This gives you a unique opportunity to network and share best practices with your industry peers.

**Wherever you are in your journey,
we have the right solution for your business**

Connect the dots

Drive decision-making and remove risks from your supply chain with real-time risk analytics and reporting.

Make smarter, faster decisions

With complete cross-commodity visibility of your physical and financial assets.

Commodity management solutions for businesses of any size

Allegro

Allegro is an enterprise commodity trading, transaction, and risk management (CTRM) solution with advanced analytics.

If you extract, process, market, trade, or consume commodities, Allegro empowers you to make the best decisions and take total control of your business.

With Allegro's data-driven decision support, you can manage your position visibility, risk, and controls, and meet your regulatory obligations easily.

Aspect

Aspect is a smart and simple out-of-the box CTRM system.

It's the only trading and risk management solution with integrated market data delivered as software as a service (SaaS) in the cloud. That means rapid deployment, controlled costs, and immediate return on investment.

Aspect can support the trade lifecycle for oil refined products, metals, petrochemicals, LPG, or chemicals. It processes large volumes of data at lightning-speed for real-time profit and loss reporting, and instant end-of-day and end-of-year reports.

Openlink

Openlink is the most comprehensive CTRM enterprise platform. It enables energy and commodity-intensive businesses to streamline and simplify high-volume, global, financial and physical cross-commodity trading and risk management.

Openlink is an integrated, end-to-end solution that provides better visibility and improves decision-making along the value chain—from lease management and generation to physical movement planning, hedging, inventory management, and actualization to settlement. Powerful, advanced risk tools help you understand and eliminate risks in your portfolio.

RightAngle

RightAngle is a single, end-to-end CTRM solution for regional and global integrated energy and commodity-intensive enterprises.

The RightAngle solution operates across liquid and bulk commodity supply chains that require deep logistics, accounting, and tax capabilities. For example, liquid and bulk crude oil, refined products, natural gas liquids (NGLs), and coal.

With straight-through processing (STP) of supply and trading information on a single platform, you get an aggregated, real-time volumetric and financial view of positions, profitability, and risk—helping you make better decisions, mitigate unwanted risk, and identify opportunities across the supply chain.

TriplePoint

TriplePoint is the ideal CTRM solution if you operate in one or more segments of the global energy and commodity supply chains. For example, power, gas, bulk, liquid, and packaged commodities.

TriplePoint supports your business from the front office to the back. It provides sophisticated real-time intelligence and automated processes for production, sourcing, procurement, processing, marketing, and distribution. It also includes dashboards and reporting tools.

With a long history and a wide base of users, TriplePoint is a proven solution for companies with diverse supply chains and stringent regulatory and auditing requirements. It can be deployed in the cloud.

Any asset, any industry, any delivery method

We give you every reason to choose our solutions

Extend your trading and risk management solution with our shipping, market data, and supply chain tools.

Algosys

Algosys is an automated metal accounting solution that can be deployed in concentrators, gold and hydromet plants, and smelters.

The solution enables metallurgists and plant superintendents to collect and evaluate data from any source, perform mass balance computations, and reconcile production data.

Aspect

AspectDSC features real-time futures tick data, advanced charting, dynamic real-time Excel tools, historical price queries, and time and sales screens for an in-depth view of trading markets.

Available on desktop, tablet, and mobile devices, AspectDSC easily integrates with any CTRM system.

FEA

FEA is a leading provider of risk analytics solutions for traders, schedulers, risk managers, and back-office professionals.

As well as a comprehensive suite of analytics tools, FEA provides world-class analytical support by Ph.D. industry experts.

Qmaster

Qmaster automates and simplifies the management of coal and mineral supply chains.

It delivers supply chain visibility, streamlines processes, enables better decision making, and helps you reduce costs to improve margins.

Softmar

Softmar supports the full chartering, operations, and risk management needs of shipping organizations.

It has the industry's most accurate voyage estimator, pinpointing the location of vessels and cargos.

WAM

WAM helps you manage your supply chain processes.

The WAM solution supports integrated business planning, sales and operations planning, demand planning, production and distribution scheduling, and inventory optimization.
