

## PROCESSING OF EGG POWDER

Adeola Balogun, co-founder of **LimLim Food Production Limited in Magodo Lagos**, we process foods and vegetables into dry snacks and powders.

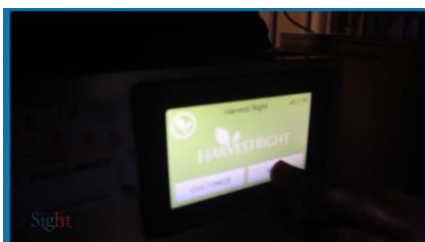

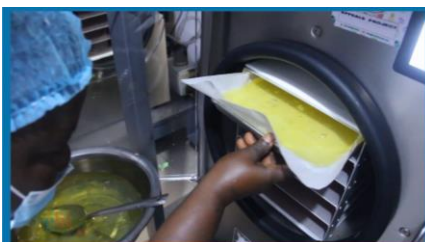

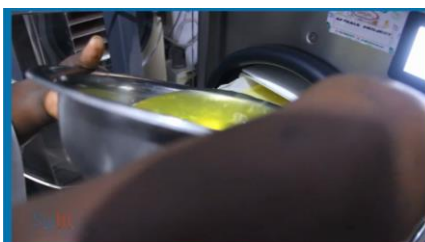

Egg powder is on the import prohibition list of the CBN. We have recently started producing egg powder for large companies and SMBs that use the powder to make products like cereals, shampoo, conditioners, and custards.

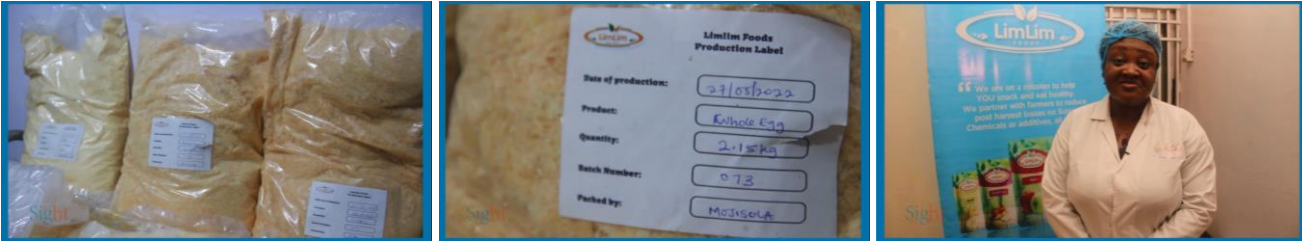

We source our eggs from poultry that do not use some anti-biotics that aren't prohibited in the final powder analysis.

Power still remains a drain on our productivity because we spend over N500K monthly on power generation
