

ABOUT

Dobi AgriCo

Nobody deserves to go to bed hungry. At Dobi AgriCo, our purpose is to ensure food security through modern agricultural innovations and practices. Since its inception in 2013, our two business divisions, Dobi AgriCo, a 200-hectare farm, and Dobi Fresh, our commodity aggregation division, have improved food sufficiency in the country.

Dobi AgriCo Commissions 95KW Solar Power Plant

Dobi AgriCo launches a 95KW Solar Power Plant in Abuja

Dobi AgriCo is proud and delighted to announce the successful commissioning of a 95KW solar power plant at the Dobi Farms, located on a 200-hectare piece of farmland in Gwagwalada, Abuja. This significant renewable energy project marks a major milestone in the farm's commitment to sustainability, sustainable operations, and clean energy generation.

The newly installed solar powerplant consists of 170 solar panels, an inverter and an Energy Storage System (ESS), positioned to generate clean electricity for the farm's operations. It is estimated that the plant will produce approximately 160 MWh of clean energy annually, equivalent to reducing 24 metric tons of CO₂ emissions annually and save approximately 64,000 liters of diesel consumption each year. With the commissioning of the solar power plant, the farm is taking a giant leap forward in reducing its carbon footprint and becoming a role model for sustainable agricultural operations in Nigeria.

The solar power plant project was a collaborative effort, made possible through partnerships with renewable energy consultants and providers, Ceesolar and Ashipa Electric. Their expertise in solar power systems has ensured the smooth installation and optimal performance of the plant. The project was also brought to life through partnerships with financial institutions - The Central Bank of Nigeria and Keystone Bank.

"We are thrilled to announce the commissioning of our 95kW solar power plant," said Ayodeji Ibosiola, the General Manager of Dobi AgriCo. "This project showcases our commitment and our dedication towards a better environment, not just for us, but for the people within the communities we serve."

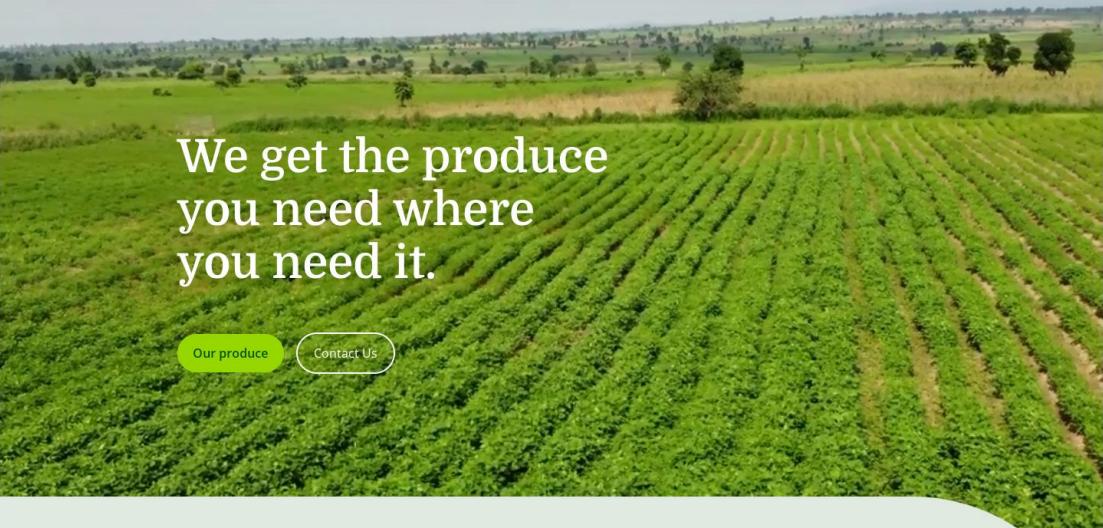

The commissioning of this solar power plant will serve as a shining example for other farms and businesses in the region, inspiring them to adopt sustainable practices and contribute to a low-carbon economy.

Automated Fertigation
& Climate Control

Water Management

Cold Chain

Automated commercial greenhouses designed to reduce costs while increasing crop yields and quality. For high yields, Our greenhouses have been tailored for our tropical climate and are supported by an innovative fertigation management system to ensure good harvests.

A dedicated nursery with fully functional automatic climate control systems for raising seeds prior to transplanting to the greenhouses.

Packhouse with dedicated cooling chambers and washing facilities for grading, sorting, and selection of produce prior to other post-harvest operations.

Our farm is equipped with a fully automated fertigation and climate control that is integrated with our drip irrigation systems.

We currently have 9 bore holes that supply a 300 cubic meters water storage tank, ensuring that water is always available on the farm. This is also supported by a 45,000 cubic meters water reservoir.

We maintain the quality and freshness of our produce with our cold chain management and logistics system- this includes a 10-ton solar powered cold room and refrigerated van used in transporting produce to customers.

Our partnerships

Ensuring high quality produce

GLOBAL G.A.P CERTIFICATION

Dobi AgriCo has established a trustworthy brand as a result of our emphasis on product quality. We have concluded training with COLEACP and are currently working to obtain Global G.A.P certification on generally accepted production practices.

HAZARD ANALYSIS CRITICAL CONTROL POINTS (HACCP)

Our HACCP management system addresses food safety through the analysis and control of biological, chemical, and physical hazards from raw material production to manufacturing and distribution of the finished produce.

GLOBAL ALLIANCE FOR IMPROVED NUTRITION (GAIN)

Dobi AgriCo partners with organizations like the Global Alliance for Improved Nutrition (GAIN) to increase sustainable access to nutritious and safe foods. One way this is implemented is through a robust workforce nutrition program that addresses breastfeeding support, healthy food at work, nutrition education, and nutrition-related health checks.

What drives us

Welcome to Dobi AgriCo

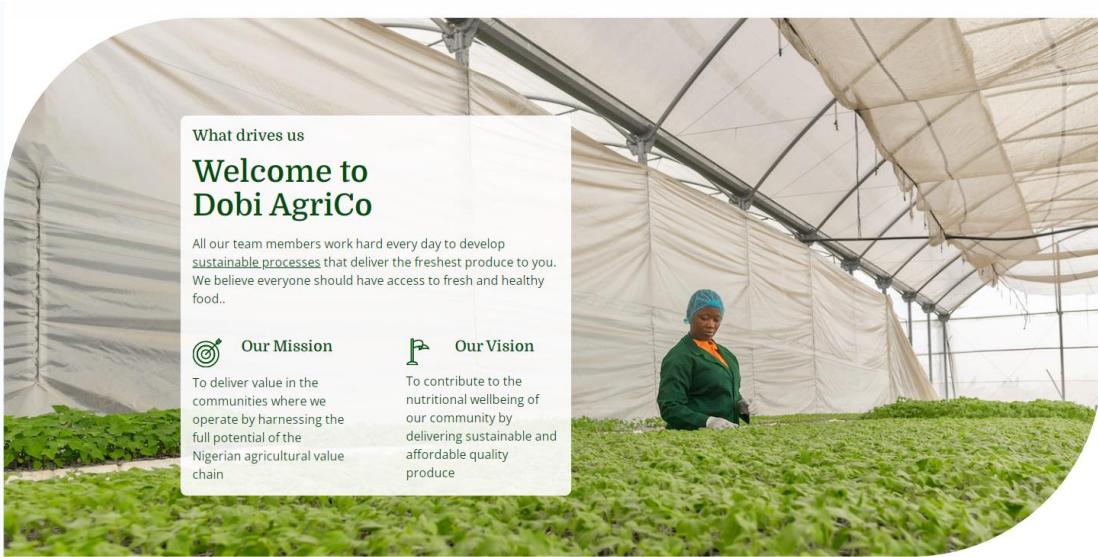

All our team members work hard every day to develop [sustainable processes](#) that deliver the freshest produce to you. We believe everyone should have access to fresh and healthy food..

Our Mission

To deliver value in the communities where we operate by harnessing the full potential of the Nigerian agricultural value chain

Our Vision

To contribute to the nutritional wellbeing of our community by delivering sustainable and affordable quality produce

Our Values

Three pillars of focus

We are committed to creating value within the agricultural sector and hold ourselves to a standard of excellence, serving our communities with integrity.

Supporting the community

60% of the Dobi AgriCo team are from the host community (Dobi), and a significant portion of these are women.

Farm - to - table

We constantly innovate and improve the produce value chain so that our clientele enjoy fresh farm produce.

Local content

In our daily activities, we prioritize the usage of local content such as people as well as farming inputs.

Our Process

A Journey from our farm to your plate

1. Sourced 2. Cultivated 3. Harvested 4. Distributed 5. Served

1 Sourced

Quality inputs such as seeds are purchased from certified sellers

Sowing is done in trays with good media, which ensures that the growing conditions are favourable for germinating and that seedlings have the required nutrients.

Our Process

A Journey from our farm to your plate

1. Sourced 2. Cultivated 3. Harvested 4. Distributed 5. Served

2 Cultivated

Production begins in the nursery, with seeds sown in trays

After sterilizing the growing media, the seedlings are placed in neat and disinfected pots which are adequately arranged in the disinfected Greenhouse.

Our Process

A Journey from our farm to your plate

1. Sourced 2. Cultivated 3. Harvested 4. Distributed 5. Served

3 Harvested

The produce is harvested at the desired level of ripening.

Depending on the purchase orders of various customers, the product is carefully harvested and stored in a controlled environment reducing the chances of bruising.

Our Process

A Journey from our farm to your plate

1. Sourced 2. Cultivated 3. Harvested 4. Distributed 5. Served

4 Distributed

Selected produce are distributed with modern, clean cold vans.

Graded produce are transported onto the cold van for distribution to various customers at a temperature of 18°C.

Those that are not ready for distribution, on the other hand, are kept in the cold room for proper storage.

Our Process

A Journey from our farm to your plate

1. Sourced 2. Cultivated 3. Harvested 4. Distributed 5. Served

5 Served

Our produce make it to your plate within a week from harvest

Throughout the year, we aggregate and supply vegetables and other produce, including sesame, to established retail chains, wholesalers, and corporate clients.

Dobi AgriCo in numbers

477,532 tons of produce since 2013

Since our first shipment of tomatoes in 2013, we've constantly improved our fully integrated agriculture structure, providing healthy, sustainable, and quality-controlled agricultural products.

Follow Us

Ayodeji Ibosiola

General Manager

Ayodeji is responsible for driving strategic objectives across the value chain of production, trading, processing and distribution of fresh farm produce at Dobi Agrico

He has over 22 years' experience in operations management, industrial farming, production, and processing, and has worked in project management, procurement, marketing, sales and business administration roles within the manufacturing, agricultural and general engineering industries.

Before joining Dobi Agrico, Ayodeji was the Chief Operating Officer (COO) for Nigeria's premier cassava starch processing company, where he was actively in charge of total operational excellence & administration. He is an industry leader with major contributions to the development of the large-scale cassava starch industry in Nigeria.

Ayodeji's educational background is in Agricultural Engineering (First degree) and he holds an MBA from Federal University of Technology, Akure

Kelvin Busolo

Head Grower

Alfred Kelvin Busolo is the Head Grower at Dobi AgriCo Limited where he oversees the staff of growers engaged in the growing, and maintenance of the company's produce.

He brings extensive experience in farm automation processes, crop nutrition, crop protection, agronomy, people and systems management, and other areas of agriculture in several African countries.

Alfred graduated from Egerton University in Kenya with a Bachelor of Science (Agriculture) with Second Class Honours and is currently pursuing a Master of Business Administration at Unicaf University (UK). He's also attended worldwide conferences and trainings such as Global GAP and GRASP, as well as internal inspection and auditing training.

Moshhood Buhari

Finance Manager

Moshhood is the Finance Manager at Dobi AgriCo and he is responsible for driving the financial strategy, financial reporting, and financial management of the company

He has over 14 years multi sector experience across financial services, Agricultural firms as well as government institutions

Moshhood holds a Higher National Diploma (Distinction) from Moshood Abiola Polytechnic Abeokuta, and a Bachelor of Science Degree from the University of Abuja, Nigeria. He is a member of the Institute of Chartered Accountants of Nigeria and the Institute of Internal Auditor Nigeria

During Moshood's spare time, he volunteers by tutoring undergraduates studying for professional Accounting examinations.

Ibrahim Sheikh

Agronomist

Ibrahim is responsible for overseeing the growth of the farm's fresh produce, and leading research on the farm's environment and other factors affecting production.

He has about eight years of experience in agronomy, procurement, greenhouse farming, industrial farming, and sales, as well as having worked on a variety of farms. Before joining Dobi AgriCo, Ibrahim was the farm manager at El-amin integrated farms Minna, where he was responsible for the company's production and day-to-day operations.

Ibrahim holds a Bachelor of Science degree in Crop, Soil, and Pest Management from the Federal University of Technology, Akure, and is currently pursuing a Master of Science degree in Agronomy (in view) from the Federal University of Technology, Minna.

Margaret Adeniyi

Farm Supervisor

In Margaret's role as Farm Supervisor, she is responsible for overseeing and supervising farm operations such as; harvesting, grading of farm produce and general crop management processes and also responsible for supervising farm hands

She has over 6 years' experience in the farming industry and has worked in different areas of fruit and vegetable farming.

Margaret's educational background is in Animal Production and Health from Ladoke Akintola University of Technology, Ogbomoso

Dobi AgriCo expands business operations with the launch of 12 additional Greenhouses

December 13, 2022

To further expand its business operations and meet the growing demands of customers, Dobi AgriCo recently launched twelve (12) newly constructed greenhouses

This expansion is in line with the overall ambition of the business, its growth strategies as well as its continuous effort to improve the nutritional well-being of its immediate community and Nigeria as a whole.

Speaking at the launch event of the new greenhouses, [Ayodeji Ibosiola](#), General Manager, Dobi AgriCo, stated that the expansion is an offshoot of the overall strategy.

"We are excited about this expansion programme because it enables us to meet the market demands while also satisfying our large customer base. With the growing expectations for the future in terms of export, this strategic expansion places us in the right path towards achieving this feat, without a doubt."

At Dobi AgriCo, we model our process with cutting-edge technology to cultivate high-quality crop produce. In 2020, we set a goal of expanding our production line, which we accomplished in 2021 by adding 12 greenhouses.

Further elaborating on the expansion's objective, Abayomi Adepoju, Group Head, Human Resource, LATC, stated, "This expansion demonstrates our commitment to positively impacting the agricultural industry and people's lives through job creation."

Building on this milestone, we will expand our agribusiness footprint through a variety of initiatives that will have a long-term impact on food security, business growth, job creation, and nation-building in general," he added.
